

Chi Pendant

1. Calibration of the energy pendant at a high Alpha frequency helps balance the bioenergy in your body to maintain a calm and healthy state. For best results, the Pendant is worn in the middle of the chest and promotes balance, strength, stamina and endurance. The bioenergy produced by the Energy Pendant stimulates brain and thought processes. The Energy Pendant is made of mineral based nano-engineered glass similar to the BioDisc but with a pulsing resonance.

2. Strengthens your resilience and resistance to the effects of tiredness and mental stress. Enhances energy levels. Athletes claim that wearing the Pendant improves stamina and endurance to give them a competitive edge. The Energy Pendant enhances capacity to function in E-SMOG environments especially for pilots, truck drivers, taxi drivers, musicians, nurses, computer operators and so on.

3. Creates a positive energy field instantly, improves the body's harmony and energy levels. Energised water carries detergent much more thoroughly into material during laundry.

4. The Chi Pendant also protects users from the electromagnetic fields in our environment or e-smog, created by electronic equipments such as mobile phones, computers, micro-wave ovens, lightings and air-conditioners, etc. The positive energy of the Chi Pendant neutralizes the negative effects of e-smog, restoring a sense of calm and wellbeing.

Benefits

1. Family chi pendant
 2. It has been known to assist and strengthen your resilience and resistance to the effects of stress.
 3. It has been known to increase your mental performance, especially under pressure and the ability to sharpen thought processes particular important for students.
 4. It has been known to strengthen your capacity to function in electro magnetic field environments (mobile phones and computers for instance). Particularly important in the work environment.
 5. It has been known to enhance your energy levels for endurance and speed. The balance of the body is also enhanced.
 6. It has been known that the Ch'i Energy Pendant improves Athletes stamina and endurance to give them a competitive edge.
- As the stresses of modern life increase, the Ch'i Energy Pendant is an essential tool for people who value performance and optimal well-being

Chi Pendant FAQ

1. What is the Chi Pendant?

The Chi Pendant produces frequency which PROGNOS tests show that it can lead to an increase in energy levels.

2. What kind of minerals are in the Chi Pendant? How many of them?

The mineral content of the Chi Pendant is fused together using transfer energy and nano fusion techniques which involve several high heat and frequency techniques.

3. How far can the energy be transferred?

Over a 500 mm circumference. The Chi Pendant should be worn to hang on the chest area.

4. Can I use it to improve sleep? How should I do it?

No. Should not be worn during sleep. The pendent should also not be worn by females during menstruation as the female hormones are over energised by the pendant at this time.

Frequently Asked Questions

1. What is the Chi Pendant?

The Chi Energy Pendant produces frequency which Prognos tests show can lead to an increase in energy levels. The Chi Energy Pendant is designed to help and enhance strength, stamina and endurance as well as being a mental stimulus.

2. How does it work?

The frequency generated can stimulate the brain's functionality while awake and reduces the effects of ES mog. Kinesiology tests are shown to be positive when the Chi Energy Pendant is worn.

3. What kind of minerals are in the Chi Energy Pendant? How many of them?

The mineral content of the Chi Energy Pendant is fused together using transfer energy and nano fusion techniques which involve several high heat and frequency techniques.

4. How does the Chi Energy Pendant transfer energy to water?

Nano Transfer energy creates a wave of pulsing frequency. When the pendant is spun around the outside of a glass of water, the frequency is transferred through the pulsing action into the water. However, the main use of the Chi Energy Pendant is not its ability to create energised water, but to enhance the energy effects of the brain's functionality and to reduce the effects of E-Smog.

THE PENDANT SHOULD NOT BE CONFUSED WITH THE EFFECTS OF THE [BIO DISC](#) AS THEY ARE DESIGNED FOR TWO DIFFERING POSITIVE EFFECTS.

5. Is there an expiry date?

No known data exists as there are no moving parts. The original samples show no sign of reduced energy or frequency since the date of manufacture three years ago.

6. Do you have any lab test results proving that the Chi Pendant works?

PROGNOS test results prove this.

7. What proof is there that the Chi Energy Pendant actually energises water?

Again, here we should not confuse the designed effects with those of the bio disc. We advise that it be used for body energising effects.

8. What is a frequency?

All known living things are governed by a frequency. This frequency can be affected positively or negatively by certain other vibrational frequencies such as electro magnetic fields which are negative to the body. e.g. mobile phones, computer screens and even air flight (jet lag). The positive frequency of the Chi Energy Pendant reduces the effects of negative electro magnetic fields.

9. How far can the energy be transferred?

Over a 500 mm circumference. The Chi Energy Pendant should be worn to hang on the chest area.

10. Can I use it to improve sleep? How should I do it?

No. The pendant stimulates strength, stamina and endurance so should not be worn during sleep. The pendant should also not be worn by females during menstruation as the female hormones are over energised by the pendant at this time.

11. How does the Chi Energy Pendant prevent Jetlag?

It reduces the effects of E-Smog on the body by constantly producing the correct frequency for strength which overcomes the negative effects of the build-up of electro smog in the aircraft cabin.

12. What other benefits does the Chi Energy Pendant have?

Endurance and mental stimulus can increase the brain's ability to cope runners, boxers and others who require strength and stamina can really pendant during school exams can have heightened memory abilities.
